OSCRAT
AT A GLANCE

OSCRAT is an EU-funded project under the Digital Europe Programme, with the purpose of supporting European SMEs with an open-source and free accessible tool to help companies assess their cybersecurity system in adherence to the provisions of the Cyber Resilience Act (CRA).

+2 Million grant

5 EU countries involved

Duration

1 December 2024 - 31 May 2026

What makes OSCRAT Innovative?

1 Automated CRA Compliance

Simplifies compliance with the Cyber Resilience Act through automation.

2 Centralized Security

Integrates cybersecurity tools like SBOM, vulnerability, and incident management.

3 Cross-Border Collaboration

Promotes knowledge sharing and collaboration across Europe for better security.

OSCRAT
IS AN OPPORTUNITY FOR..

SMES IN THE DIGITAL PRODUCT SECTOR

- Improved cybersecurity awareness.
- Shift from reactive to proactive security measures.
- Support for CRA compliance through automated procedures and documentation.
- Ability to better manage cybersecurity risks with a user-friendly, cost-effective solution .

DECISION & POLICY MAKERS

- Enhanced cybersecurity resilience and compliance with regulatory standards.
- Access to advanced risk management tools and threat intelligence.
- Support for developing incident response plans and third-party risk management.

DIGITAL INNOVATION HUBS (DIHS)

- Enhanced service offerings for SMEs by integrating the OSCRAT tool.
- Opportunities for collaboration and networking with cybersecurity experts.
- Access to cutting-edge cybersecurity tools and technologies, fostering innovation.

CYBERSECURITY EXPERTS

- Active contribution to the development of a tool that aligns with the latest cybersecurity standards.
- Improved ability to detect, analyze, and respond to cyber threats in line with CRA compliance.

INDUSTRY ASSOCIATIONS

- Support in advocating for cybersecurity best practices and compliance standards across industries.
- Engagement in public awareness campaigns on cybersecurity challenges and solutions.
- Contribution to the development and standardization of cybersecurity measures
